

hello, In my 50 years of life ive never written a goverment office,so this is pretty crude.

I am hoping that you reject petition 04-160. Satelite radio is not a free service,and does not broadcast over the public airways. Also in this time of tight budgets I think that these broadcasters need to start paying for this airspace,not get it for free. Also my local stations havent had local public service for years.

Thank you
Tom Bowman
